

SYNTAL® ACRYL TEAK

The innovative material in shipbuilding
with further advantages:

- impact resistant, highly stable, robust and scratchproof
- damaged surfaces can be repaired on board,
on the spot
- graffiti easily removed
- anti-slip ribbed (on demand)
- weight identical with that of wood

Production · Sales · Fitting

SYNTAL® ACRYL TEAK

The innovative material in shipbuilding:
suitable for all outdoor deck areas

Enduring, significant cost savings

Production · Sales · Fitting

Traditional deck designs

now possible using **SYNTAL ACRYL TEAK**

- absolutely weatherproof, requires no upkeep (e.g. sanding or painting), no need for dismantling or replacements
- very high colour fastness to light and UV
- material does not absorb water, surfaces dry fast

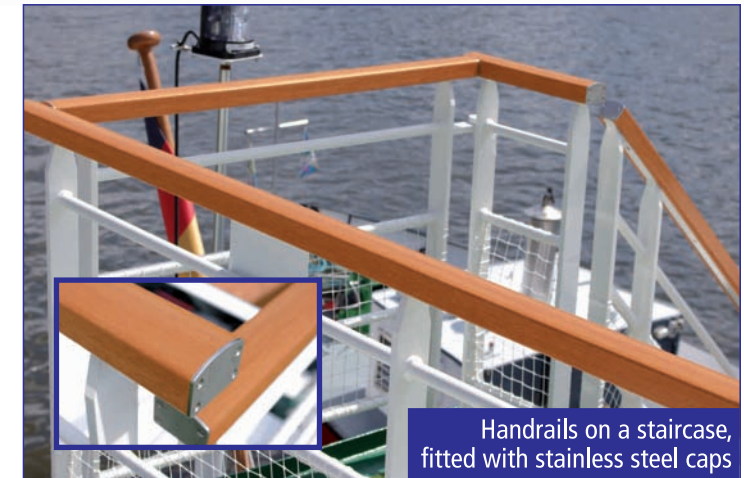

Picture shows poolsection with roundarea

- Pre-assembly takes place in our workshop
- Adjustments and fitting carried out on board

The natural TEAK look is shown to best advantage

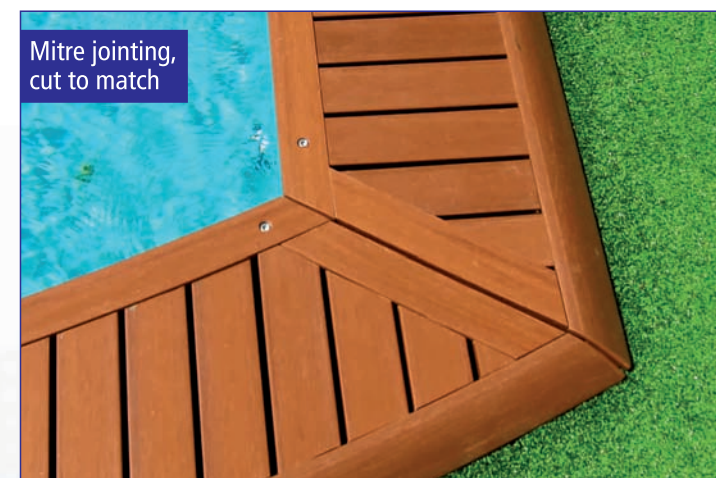

Handrails on a staircase, fitted with stainless steel caps

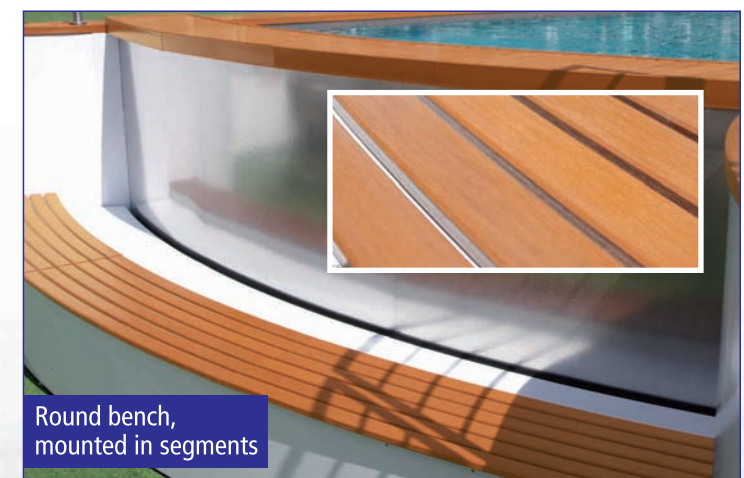

Inner and outer curves possible along with extreme rounding

Anti-slip ribbed shower tray on sun deck

Mitre jointing, cut to match

Round bench, mounted in segments
